

ECRC Development

Phase Two – Target Date 2025

Enclosed Cricket Lanes

- Indoor nets, with heating and lighting, can take place on site rather than players and juniors having to travel elsewhere. It would allow members to practice free of charge year-round, unrestricted by the elements.
- Other local clubs could also rent the facility – providing a source of income for the club during the quieter months.
- The Bowling Club could utilise it (being dry and warm) rather than the MUGA during the winter.
- Security – access by keypad - only available to members
