

ECRC Development

Phase Three – Target Date 2027

Scoreboard Redevelopment

- Extend the storage facility for ground equipment.
- The unsightly metal storage container would be removed from site.
- The current scoreboard building requires repeated maintenance to stop leaks.
- We would build a decking area for viewing above where the covers are stored.
- There would also be a small accommodation for the overseas cricket pro to live in.
- A further raised viewing gallery with glass balustrade for members.
- It would be constructed of materials in keeping with the clubhouse.
- A small bar and toilet provision would be included.
