

ECRC Development

Phase One – Target Date 2024

Clubhouse Re-design

- Move the windows of the clubhouse to the line where the shutters are currently (part of the 2006 build so it is in line with the 2019 build).
- Extend the kitchen to give more working and storage space together with access from the car park.
- Re-jig the toilets to give greater capacity for both men and women.
- Install an additional internal retractable wall – when the wall is up currently, the members area is too congested at times. This will allow for a more comfortable members experience.
